

IBM FlashSystem 5300 Operational Resilience Bundle

Protect your data from cyber-attacks, **detect** anomalies, and **recover** operations in 60 seconds or less – *guaranteed*.

Businesses of *all sizes* face persistent cyber threats in today's world. These threats and the real potential for business disruptions can be especially damaging to organizations with fewer resources. This makes it more essential than ever to create a foundation that keeps your valuable data safe and keeps your business running.

Get to know the Operational Resilience Bundle

1. IBM FlashSystem 5300

A **high-performance, scalable storage system**, ideal for organizations of *any size*. It boasts a capacity of up to 1PB, housed in a compact 1U design, featuring IBM's FlashCore Module technology, harnessing computational storage for optimized performance.

2. IBM Storage Insights Pro

A cutting-edge SaaS-based AI Operations service. It offers **real-time threat detection**, system performance analysis, application analysis, and intelligent advisories, empowering you to **effectively safeguard and optimize your storage infrastructure**.

3. 256GB Controller Cache Upgrade

Offered at zero cost when configured within the bundle's terms, this ensures top-tier performance using IBM Safeguarded Copy, enabling greater resilience without compromising operational efficiency.

4. Optional: IBM Storage Sentinel

An added layer of security, offering advanced monitoring and analytics to proactively identify, prioritize, and remediate potential security risks for SAP HANA, Oracle Database, VMware, and EPIC workloads.

Operational Resilience Made Simple

Early Detection

Our advanced defense capabilities identify anomalies, threats, or malicious activities **within 60 seconds**, preventing the spread of threats across your IT environment.

Robust Protection

Verified restore points that align with your Recovery Point Objectives safeguard your data integrity. They ensure that no malicious code is reintroduced during the recovery process, enabling you to confidently recover your essential business operations.

Rapid Recovery

After a ransomware attack takes place (and it almost certainly will at some point!), our **60-second Recovery Time Objective guarantee** helps reduce downtime with almost immediate access to uncorrupted backups from known good air-gapped snapshots. IBM FlashSystem guarantees the restoration of original application performance, optimizing for speed and efficiency.

A Secure Future Awaits

With IBM's trusted protection, your business can confidently navigate today's digital landscape. Discover our innovative operational resilience solutions today! Explore our industry-leading operational resilience capabilities further at www.ibm.com/flashsystem or [contact us](#) directly.
